DESCRIPTION
Generac 600-800 amp non-service rated switches are compatible with the full 22-150kW line of liquid-cooled generators. The switches are open transition and are available in 120/240 1ø, 120/208 3ø, 120/240 3ø, and 277/480 3ø.

STANDARD FEATURES
600-800 amp non-service rated transfer switches are housed in a rugged steel NEMA/UL Type 3R enclosure, with electrostatically applied and baked powder paint. The Heavy Duty Generac Contactor is a UL recognized device, designed for years of service. The controller at the generator handles all the timing, sensing, exercising functions, and transfer commands.

DPM Technology (single phase switches only)
Through the use of digital power technology (DPM), these switches have the capability to manage up to 4 individual HVAC (24 VAC controlled) loads with no additional hardware. When used in tandem with the Smart Management Modules, up to 8 more loads can be managed as well, providing the most installation efficient power management options available.
600-800 Amps  Non-Service Rated Smart Transfer Switches

Functions
All timing and sensing functions originate in the generator controller

- Utility voltage drop-out
- Timer to generator start
- Engine warm up delay
- Standby voltage sensor
- Utility voltage pickup
- Re-transfer time delay
- Engine cool-down timer
- Exerciser

- The transfer switch can be operated manually without power applied.
- *When used in conjunction with units utilizing Evolution™ controls

Features
- Electrically operated, mechanically-held contacts for fast, positive connections.
- Rated for all classes of load, 100% equipment rated, both inductive and resistive.
- 160 millisecond transfer time.
- Single coil design.
- Main contacts are silver plated or silver alloy to resist welding and sticking.
- NEMA/UL 3R (indoor/outdoor rated) rugged steel enclosure is standard.
- Limited 5 Year Warranty.
