More Choices. Multiple Service levels.
Choose the right solution for your needs

Mobile Link remote monitoring lets you get and share information about your home standby generator no matter where you are, using your computer, smart phone, or mobile device. View your generator’s status and maintenance needs. Set its exercise schedule. Review its running and maintenance history. And get notified of status changes.
Your Generator’s Information, at Hand and in One Place

**DISPLAY**
The color-coded background gives you at-a-glance information about your generator.

- **Green**: Your generator is ready for action.
- **Blue**: Your generator is currently running.
- **Yellow**: Your generator needs maintenance, but is otherwise ready to run.
- **Red**: Your generator has a problem, and needs immediate service, or is set to off.

**SUPPORT FOR MULTIPLE GENERATORS**
If you have multiple generators, you only have to scroll left and right to select them.

**LINK STATUS**
If for some reason your generator isn’t connected network, an icon will appear to let you know.

**ALERTS**
When your generator has a problem, you can click on alert icon to find out the details.

**GAUGES**
This instrument cluster shows total generator running time, voltage status and fuel level in diesel fueled generators.

**GENERATOR DETAILS**
Click here for generator details, like serial number and description, maintenance and status history. If you select a preferred servicing dealer, their info will be available, and you can click to call them.
**Superior Service**

You can always be connected to view the status of your generator and notify your authorized Generac dealer to service and support your generator.
