Mobile Link cellular remote monitoring lets you get and share information about your home standby generator no matter where you are, using your computer, smart phone, or mobile device. View your generator's status and maintenance needs. Set its exercise schedule. Review its running and maintenance history. And get notified of status changes. The Mobile Link device can be installed in minutes. Because it sends data via cellular network, it's easier to configure and more reliable than the Ethernet and telephone connections found in many competitive remote monitoring solutions.

For more information, visit www.MobileLinkGen.com or call 855-GEN-VIEW (855-436-8436) (US) 544-MILS-GEN (644-443-9436) (Canada).
Your Generator’s Information, at Hand and in One Place

COMPATIBLE UNITS

On your way to the airport, you see your generator needs maintenance. You click to call your preferred servicing dealer while you’re away.

From your hotel, you get notifications that your generator is exercising as it should.

During that long business meeting, Mobile Link tells you that your generator is ready to protect your family at home if the power goes out.

At dinner with friends you see that there’s a problem with your generator. You click to call your dealer to have it fixed before the next power outage.

Support for multiple generators

If you have multiple generators, you may have to scroll left and right to select them.

Cellular link status

If for some reason your generator isn’t connected to the cellular network, an icon will appear to let you know.

Alerts

When your generator has a problem, you can click on alert icon to find out the details.

Gauges

This instrument cluster shows total generator running time, battery voltage, generator output voltage and frequency, and fuel level in diesel-fueled generators.

Generator details

Click here for generator details, like serial number and description, maintenance and status history. If you select a preferred servicing dealer, their info will be available, and you can click to call them.

Your Generator’s Information, at Hand and in One Place

Color-coded background gives you at-a-glance information about your generator.

• Green: Your generator is ready for action.
• Blue: Your generator is currently running.
• Yellow: Your generator needs maintenance, but is otherwise ready to run.
• Red: Your generator has a problem, and needs immediate service.
