

INTRODUCING

Mobile Link Industrial Connectivity

Mobile **Link**™

Downtime due to power outages can be costly. With Mobile Link Industrial 4G LTE Connectivity your service provider maintains a 24/7 connection to your generator, enabling improved generator operations, improved service response time, and most importantly increased generator uptime!

One connection, ultimate peace of mind

Mobile Link Industrial is a virtual generator monitoring service that provides an extra layer of protection when you need it the most, resulting in:

IMPROVED OPERATIONS

With Remote Monitoring, your generator has eyes on it 24/7, improving its operations and ready to run status.

IMPROVED SERVICE RESPONSE

Should an issue arise, your generator service provider will have real-time, detailed information enabling them to respond quickly and appropriately.

AVOIDED SERVICE VISITS

Mobile Link ensures your service provider is only a mouse click away, enabling remote service and, in some cases, avoiding on-site visits.

IMPROVED UPTIME

All of this translates into improved generator uptime, which is the amount of time that your generator is ready to run in the event of an outage.

Virtual Service = Increased Uptime

Once you're connected to the Mobile Link service, your service IDC can monitor the status of your generator wirelessly for you, in real-time, to ensure your generator is ready to run when you need it the most.

Total Peace of Mind

REMOTE CONTROL

Enables virtual control of generators to send commands reset faults, alarms or change generator parameters, all without sending a tech.

24/7 MONITORING

Enables 24/7 remote generator monitoring, receiving alerts notifying us as soon as an urgent generator event has occurred.

REPORTING

Enables the creation of detailed generator reports that are used to satisfy state and regulatory requirements for NFPA 110.

DETAIL & HISTORY

Enables immediate drill down into detailed parameters and generator history to identify issues before they increase in severity.

The Ultimate Remote Service Package

- 24/7 Status Monitoring
- Generator Alerts
- Remote Service Control
- Generator History View
- Detailed Parameter View
- Automatic Firmware Updates
