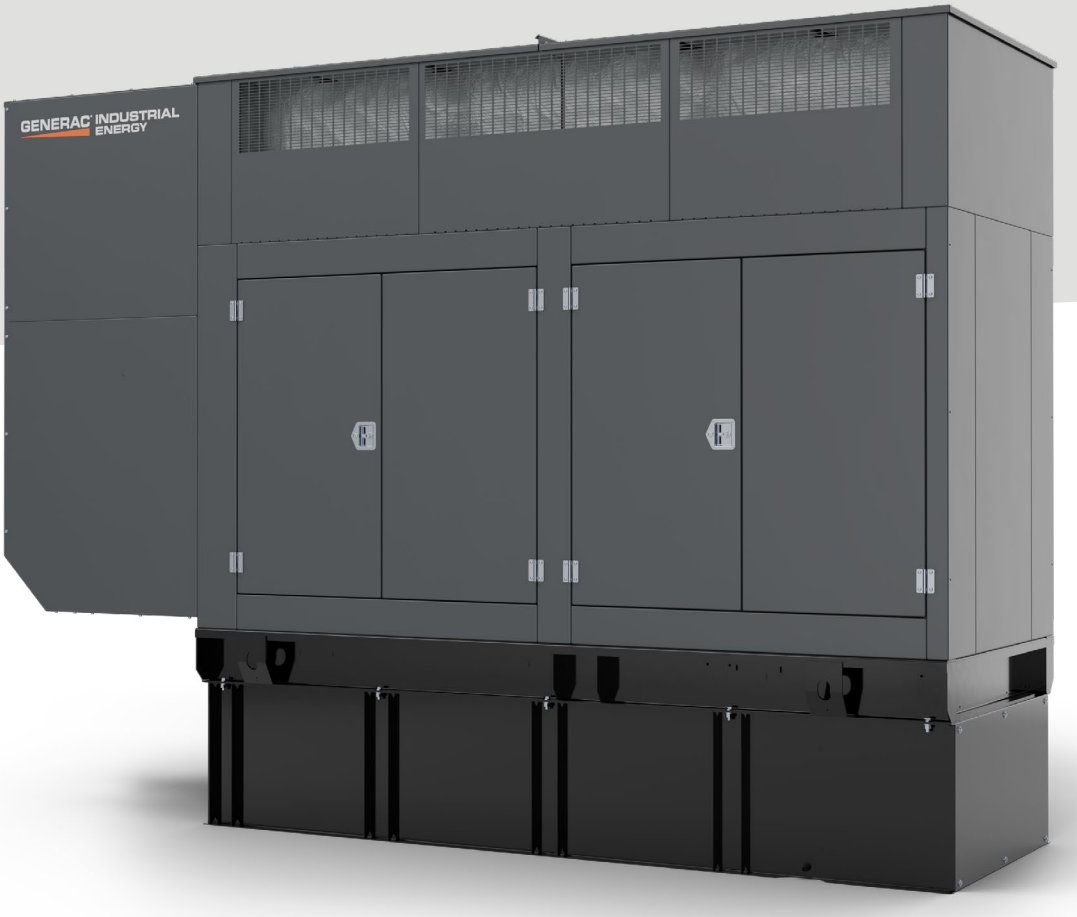
GENERAC® INDUSTRIAL ENERGY

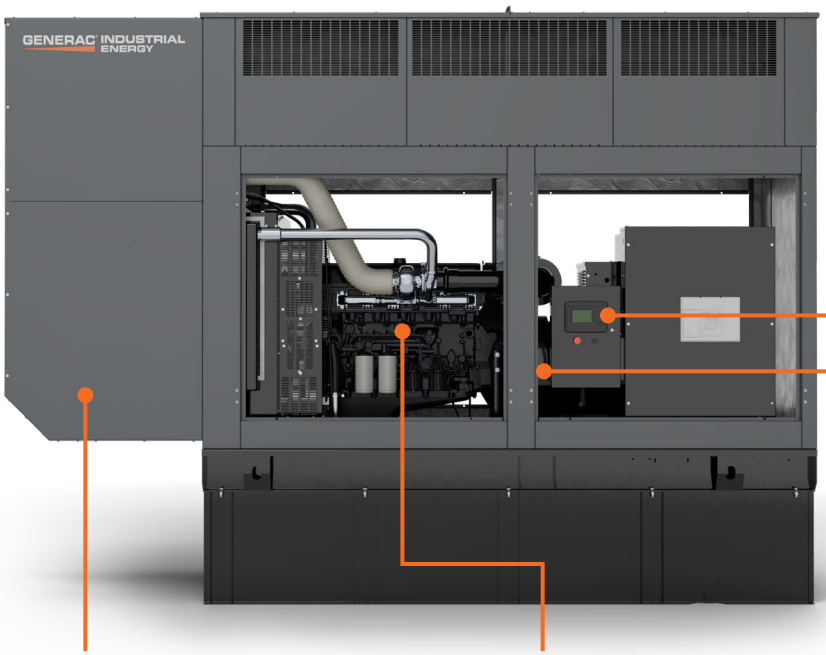
# D10.3L Diesel Industrial Generator

## Scalable Power. Proven Performance.

**275 kW | 300kW**



Generac's 10.3L industrial diesel generators deliver robust, reliable standby power with the flexibility to scale as your needs grow. Generac's Modular Power System (MPS) architecture makes it simple to expand capacity — connecting additional units, even across fuel types, for extended runtime and cost-efficient redundancy.



**Deep Sea G8601 Controller**
Advanced control platform with PLC functionality, Modbus® RTU/TCP, SNMP, integrated data logging, and on-screen system mimic (SLDs).

**Industrial Alternator**
Brushless permanent-magnet excitation alternator with Class H insulation and <5% THD dleivers clean, stable power for sensitive equipment.

**Engineered Enclosures**
Generac-built enclosures feature sound-absorbing materials, corrosion-resistant coatings, and extreme weather protection.

**Proven 10.3L Diesel Engine**
Turbocharged, aftercooled 6-cylinder engine delivers exceptional load response and steady power output for critical operations.

**Integrated Paralleling Capability**
Modular Power System (MPS) design enables “plug-and-play” scalability with up to 99.999% reliability — supporting diesel, natural gas and LP configurations.

## IDEAL APPLICATIONS:

- **Medical Facilities**
- **Industrial Facilities**
- **Municipal Infrastructure**
- **Edge Computing**
- **Commercial Buildings**

## Scalable. Resilient. Ready to Grow.

Whether you’re planning for today’s load or designing for tomorrow’s expansion, the D10.3L diesel platform delivers dependable standby power with built-in scalability. With Modular Power System capability, it enables flexible growth and redundancy—without locking your facility into a fixed power footprint.
